# Rediscover Yourself

NIKU Neuro AG introduces a new way of trainings for a wide range of clients. The NIKU and XPOWERof10 are methods that can be done in the form of SELF-TRAINING. Because only training that leaves a mark on the brain, or shows change, will improve the way we perceive ourselves and the world around us – helping us to restore confidence and security in our own minds. With the use of digital technology, processes are set in motion that bring about a better life. Here we talk to Margit M. Schreier about its admirable work as it wins Best Brain Research & Technology Provider 2022.

The processes of NIKU Neuro AG are based on neuropsychological principles and it helps people to rediscover and focus on who they really are – creating psychological strength with a better memory, more confidence, and greater well-being.

Focusing on how we can revive, remember, and reinvent ourselves, Margit M. Schreier tells us all about the human mind and how extraordinary it truly is. She says, “We humans have an incredible, under-appreciated good fortune – we can develop mentally throughout our lives.” One of NIKU’s wonderful powers is in its ability to transform our narrow view of ourselves so that we can bloom.

This is the enchanting focal point of the senses, which are all digested by the human brain. From the smallest thoughts to our entire view of ourselves, NIKU has the power to encourage positive outlooks that will ultimately change our view of ourselves.

But we also sometimes must satisfy the needs of the past to have more strength for the present and for the future. The NIKU process is intended for this purpose. One of NIKU’s wonderful powers is in its ability to transform our narrow view of ourselves and expand it so that we can bloom.

With NIKU, we can all better our mental health and, in a world of confusion, we can find more clarity, more transparency in the support that it provides. “With NIKU, solutions are offered that provide relief from psychological stress from the very beginning.

If one has strengthened oneself with NIKU, then one can now desire the present. And you can enjoy if you live in the condition of being successful and thriving especially, in economic well-being.

Commenting on this ability to reshape our brains, through the XPOWERof10 programme, Margit understands that everyone can benefit from the services that SELF-TRAINING offers daily. If you feel strong, you can now find your PERFECT LINE to your own ventures and start SELF-TRAINING to really achieve everything you want to achieve now.

“With the Training Materials N 1 SELF-TRAINING can be done to not only stay fit, but to become happy and successful”, reports Margit. With the Training Materials N 2 everyone can become a champion in his field. And with the Training Materials N 3 the strengths are built for the future. Here the brain is prepared for the current and future technology. Yes, this is the person who prepares, but the brain needs training. That is why NIKU Neuro AG offers SELF-TRAINING for brain and technology.

Doing all it can to help others to succeed, NIKU Neuro AG also offers bespoke trainings to its clients, allowing them to develop confidence and learn new thinking patterns – which inevitably influence their behavioral patterns – taking them from a potentially unhealthy mental and physical state to a strong position, for the rest of their lives.

NIKU Neuro AG can expertly aid people from all over the world. Margit tells us, “Our strategy is to find representation in each country in order to work well together and take into account cultural nuances.” Being there to support people from all walks of life, NIKU’s team guarantees greater clear procedures in the trainings for their development for its many clients.

With regards to this highly intelligent support technology, Margit explains, “We can no longer live without technology. Therefore, it is better to get out of it the elements that will be needed to build life and the future. XPOWERof10 Training Materials N 3 prepare you for the future to prevent stagnation. Our procedures are oriented to the latest technologies of the future such as ChipBrain or MetaVerse. So, you can choose the good and protect yourself from the harmful influences.”

Awarded Best Brain Research & Technology Provider 2022, NIKU has caught the eye of many – making it an unrivalled business in its industry. Not only does it help us to improve and maintain our psychological well-being, but it also aids us in shaping who we are when we feel lost. We wish it all the success as it continues to skyrocket.
